

FluidEQ

Your sound, finally worth watching

Equalizer, music player and karaoke for Windows.

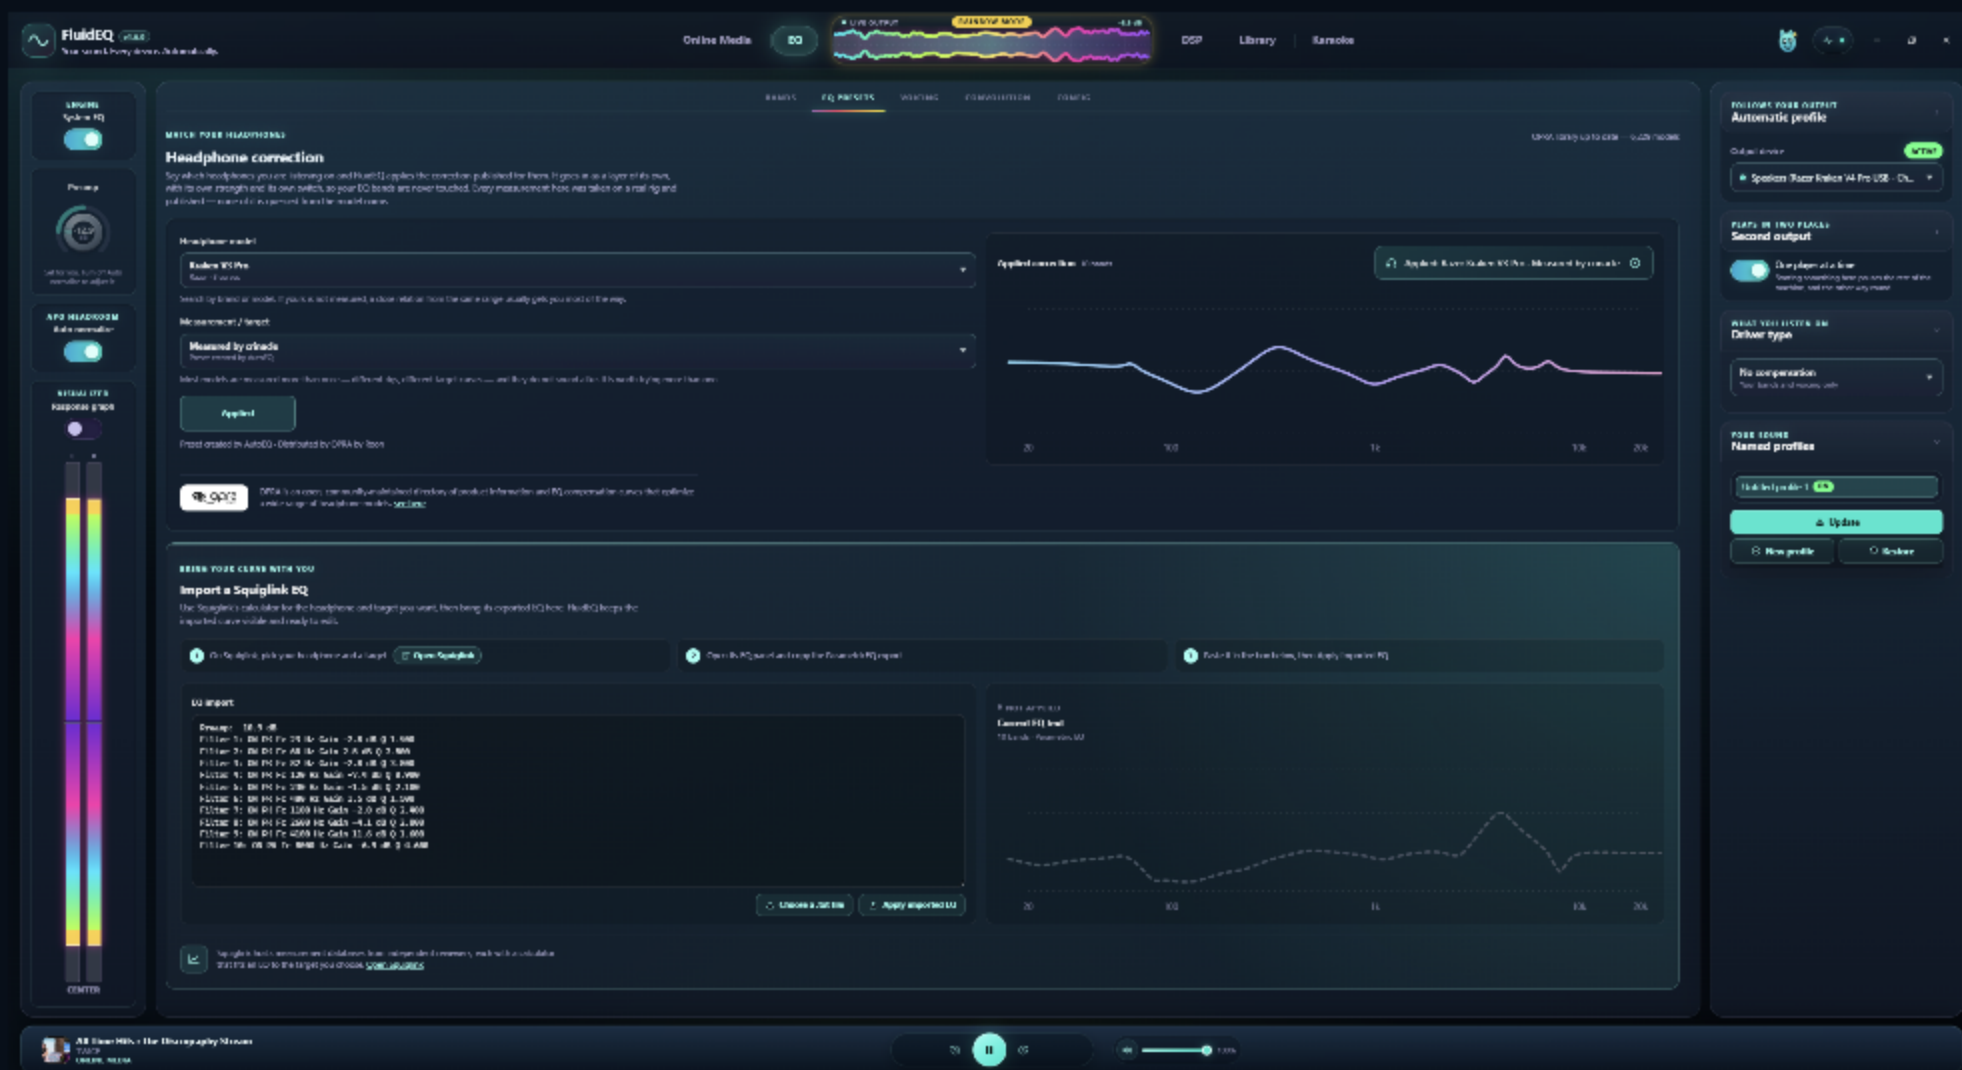

Free and open source

fluidEQ.com

01 / 09

Tuning that fits your headphones

Start with a measured correction.
Then make the sound your own.

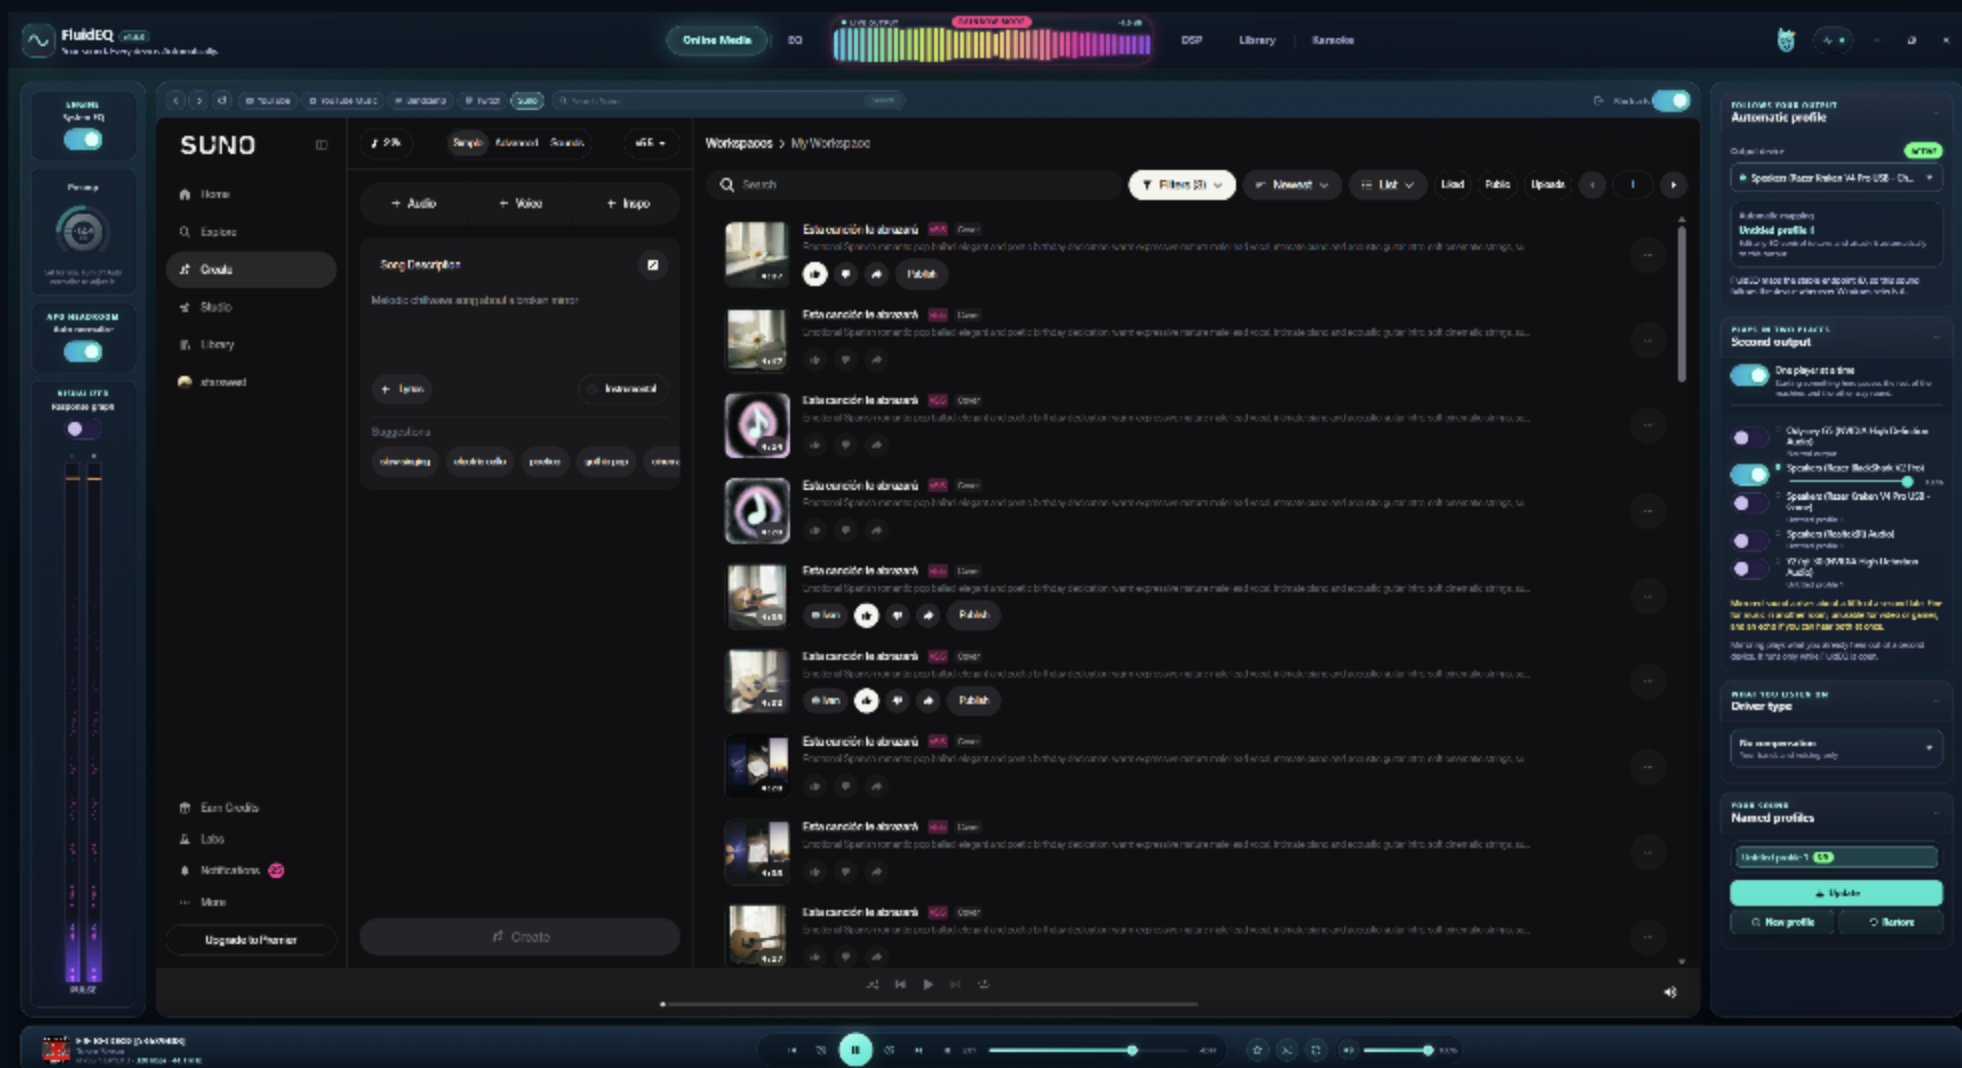

6,229

headphone models
in the offline OPRA library

Each device keeps its own sound

Switch from headphones to speakers.
Your saved tuning follows the output.

Up to 128 EQ bands per output

System EQ on Windows, powered by Equalizer APO.

More control over your local music

Clean up noise, shape bass and control loudness. Save the processing chain you like.

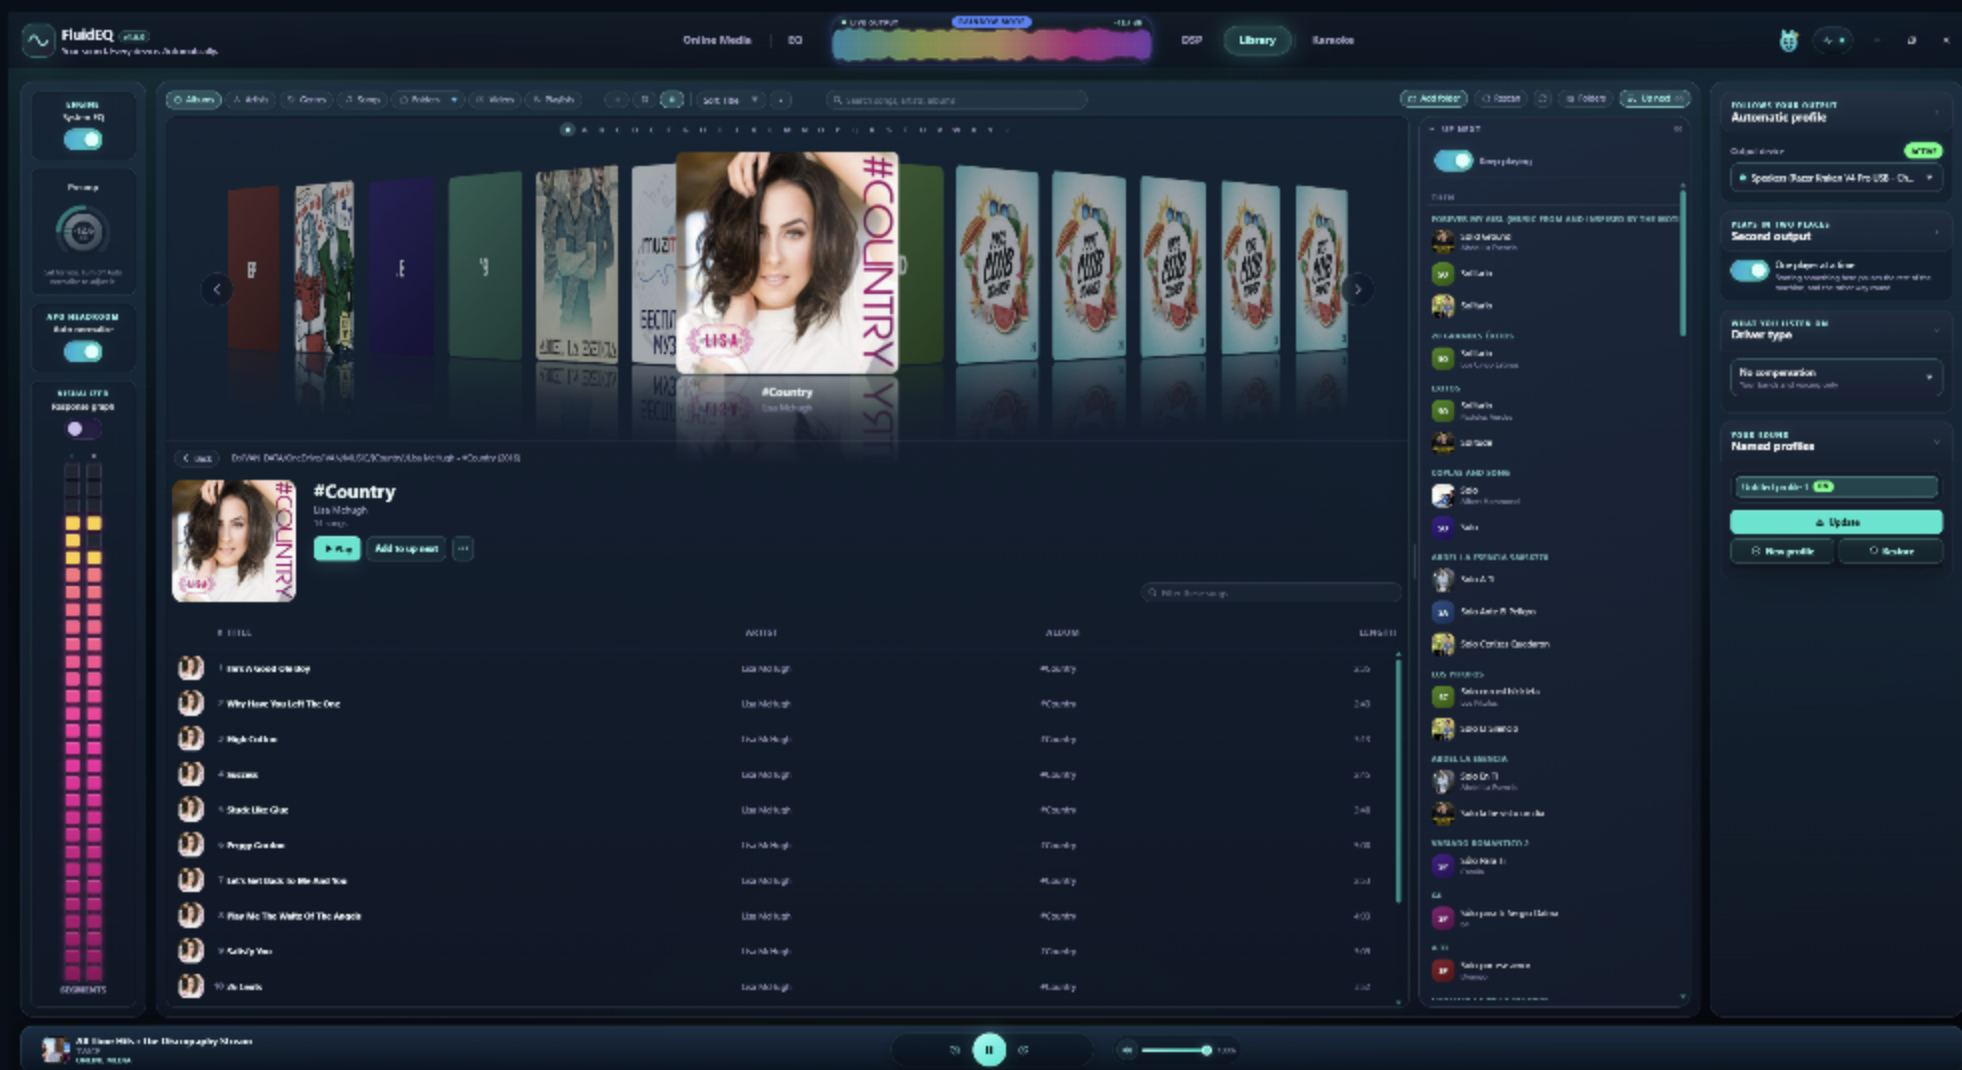

9 processing stages

DSP applies to FluidEQ's local player, not other apps.

Your collection, back in the spotlight

Browse your albums in Cover Flow.
Build a queue from the music you already own.

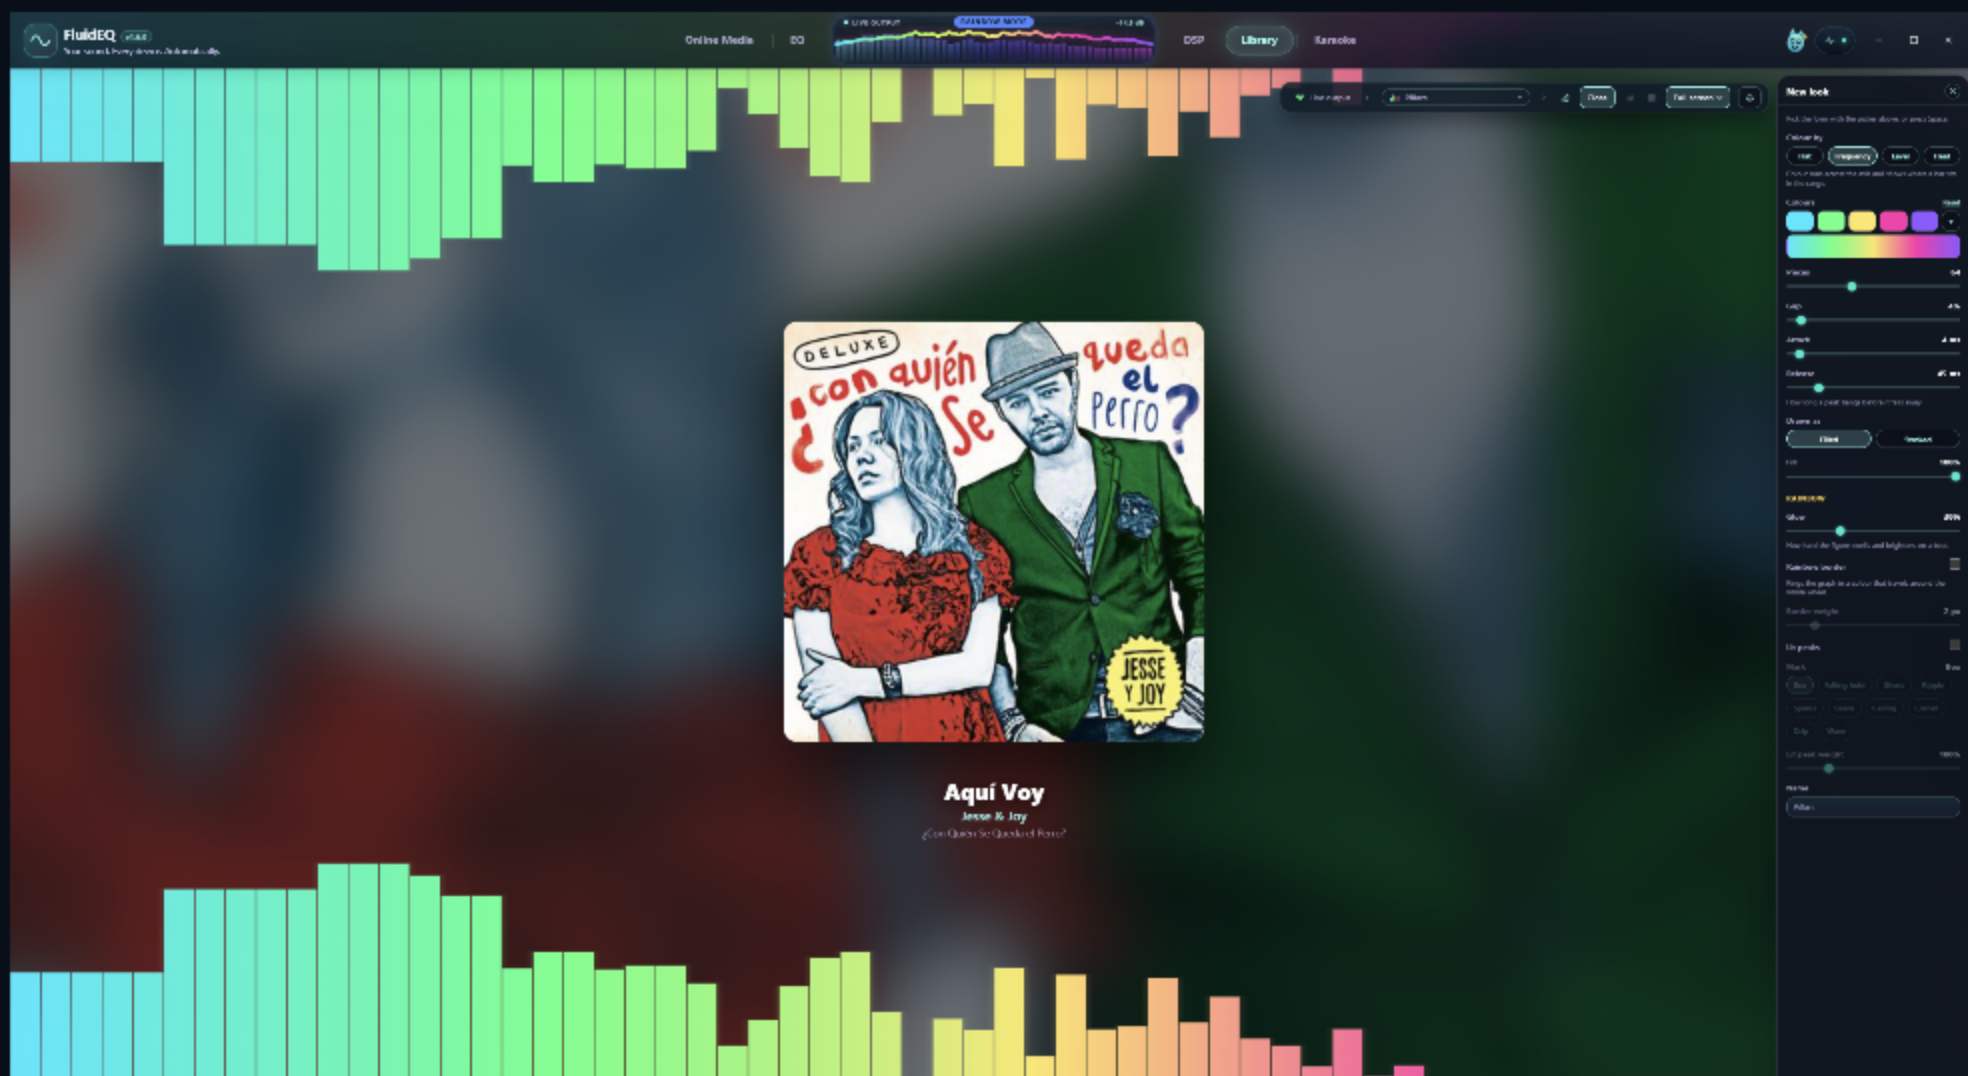

A home for your local music

FLAC, MP3, WAV, M4A and more.

A visualizer with your signature

Choose a form. Adjust its color and glow.
Watch your music fill the screen.

Made to be personalized

Live controls for palette, density and motion.

Your next karaoke night starts here

Bring your songs and timed lyrics.
Sing along on a full-screen stage.

Live pitch feedback

Connect a microphone. Target notes need a compatible lyric file. Music is not included.

A karaoke version you can make yourself

Separate voice and backing. Edit lyric timing and melody notes in Karaoke Maker.

Your audio stays on your PC

Optional AI tools download models once.
Use music and lyrics you have permission to use.

FluidEQ

**Your next listen
could feel different**

Free for Windows 10 & 11.
Open source. No FluidEQ account required.
